

The main goal of Collegium Charter School is to prepare students for the rigors of college. Through a partnership with [Virtual High School \(VHS\)](#), Collegium proudly offers the online learning options listed below as 2016-2017 electives. We are excited to give our students the opportunity to participate in an online environment, while still having the support of our dedicated faculty and campus resources.

VHS courses are offered to enhance the comprehensive curriculum at Collegium. Our online learning options are just one more way in which Collegium Charter School helps to prepare students for college and beyond. To view the VHS course description, simply access each course link.
